To Whom It May Concern;

Alan Nadel has been the primary Patent Attorney for Brentwood Industries, Inc. for more than 30 yrs. and I have personally worked with him for almost 23 yrs.

Nr. Nadel has worked with us on as many as 30 different patents over this time frame. All of which are complicated highly engineered products, that we patented in the US and in some cases all over the world. I have found Mr. Nadel to be very professional, timely and has the background and intellect to understand the intricacies of our products and the patent experience to be successful in protecting our intellectual property rights.

I would highly recommend Mr. Nadel to any company large or small for all of your patent needs.

Regards,
